

Resident Care Records System (RCRS)

In a snapshot; we know data and its management. RCRS is designed to provide you and your staff with a comprehensive tool to manage your residents' records.

Control

Staff are only granted access to the functions they need.

Consistent Data

RCRS contains a comprehensive list of lookup tables that allows your system administrator to define valid codes and values. No misspellings, no made up values. Controlled. Sensible. Consistent.

Productivity

Keeping data consistent allows for immense productivity gains. RCRS allows for an incredible amount data, including documents, to be recorded per resident.

Using "Tab within Tab" technology we allow you to have all the information to do with a resident at your fingertips.

At a glance you can quickly choose which aspect of a resident's information you can modify.

Interface

Using the latest HTML5 technology we provide a simple easy to read and use interface. Your staff can choose any browser they're comfortable with. We know that the investment in computer equipment that many clients have made is substantial.

Browser Access

Regardless as to whether you have Apple, Android or Windows devices your staff have access through any of the popular browsers including Safari, Opera, Firefox and Google Chrome.

Your users even get to choose their own theme.

Emailing

RCRS has its own internal email engine. No need for staff to download or print out documents/reports, just send to the relevant person. We also include an automated internal email address book.

No need for special linking to Microsoft's Outlook or Mozilla Thunderbird.

Secure

Access to RCRS is controlled by user login profiles. You decide. We can restrict access to in-house (LAN only) or we can set up secure access via the Internet.

Licence

We licence RCRS on the number of beds you have in your facility. There is no restriction on the number of residents or users.

History

RCRS allows you to keep the history of discharged residents, including any documents.

Search

RCRS makes searching easy. Using indexed and non-indexed functions most information is quickly retrieved, saving time and frustration.

Integration to HDS

Working with the team from [HDS Tech](#) we've reduced the amount of double handling of information to allow for seamless kitchen/nutrition updates.

Resident Care Records System (RCRS)

Features

Some of the features available in RCRS.

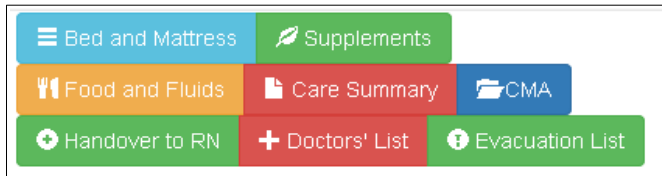

Reminders

- General Reminders For staff
- Resident Action for staff reminders

Rem ID	Res ID	Start	End	Frequency	Last	Next
S2ADM010V51	274	04-JUN-2019	01-JUN-2029	DAILY		05-JUN-2019

Reports

RCRS comes with many useful reports. If we don't have the report you need, maybe we can create it.

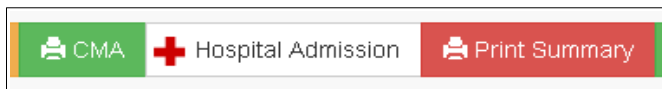

Reports are generated as PDF files. Print, download or email straight from RCRS.

Templates

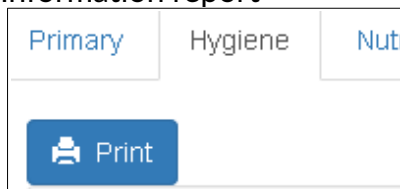

- The Barthel Index – Set up your Barthel definitions for simple completion
- Care Plan – set up predefined care plan structures to ensure consistency

Resident Specific Reports

- Comprehensive Medical Assessment
- Hospital Admission Info Report
- Resident Summary Report

Hygiene Information report

Notes

Residents
